ABDALRHMAN KHALED MOHAMED HFNAWEY

Shrqia, Egypt | +20 1202631083 | abdalrhmanhefnawy@gmail.com | linkedin.com/in/abdalrhmanhefnawy
Portfolio: abdalrhmanhfnawey.vercel.app | GitHub: github.com/abdalr77man

CAREER OBJECTIVE

Junior Full Stack .NET Developer (ASP.NET Core backend focus) and Computer Science undergraduate with hands-on experience in building scalable RESTful APIs, relational database design, and object-oriented programming using C#, ASP.NET Core, SQL Server, and Entity Framework Core. Proven problem-solving skills backed by 200+ solved algorithmic challenges on Codeforces. Seeking an entry-level Backend Developer role to contribute to robust software solutions.

EDUCATION

Bachelor of Science in Computer Science | Zagazig University, Egypt

Expected Graduation: 2027
Relevant Coursework: Data Structures, Database Management Systems, Object-Oriented Programming (OOP), Operating Systems, Algorithm Analysis & Design.

TECHNICAL SKILLS

- **Programming Languages:** C#, SQL (T-SQL), JavaScript (Basic), C (Arduino) , C++ (College Study & Problem Solving)
- **Backend Development:** ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, LINQ, RESTful APIs
- **Frontend:** HTML, CSS, JavaScript
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Clean Code, Clean Architecture, Database Design
- **Databases & Tools:** SQL Server, T-SQL (Stored Procedures, Triggers, Views), ERD, SQL Server Management Studio (SSMS), Visual Studio, VS Code, Git/GitHub

TECHNICAL PROJECTS

EasyShop – E-Commerce Web Application (Team of 5) | *C#, ASP.NET Core MVC, EF Core, SQL Server*
Live Demo: easyshop.runasp.net | Code: github.com/M3NNa-Reda/EasyShop

- Developed a full e-commerce web application with a team of five in 20 days and presented it to the supervising professor.
- Supports product variants, a cart with stock checks, checkout with coupons, and an admin area for managing the catalog, orders, and payments.
- Follows Clean Architecture with EF Core code-first migrations on SQL Server, cookie authentication with role-based access, and PBKDF2 password hashing.
- Collaborated through Git/GitHub using feature branches and pull requests; deployed online on runasp.net hosting.

Smart City Management System | *C#, .NET, OOP*
Code: github.com/abdalr77man/Smart-City-Management-System

- Built a console-based system in C# that manages smart devices and vehicles using inheritance, abstract classes, interfaces, runtime polymorphism, method overriding, and constructor chaining.

Library Management System | *SQL Server, T-SQL, Database Design*
Code: github.com/abdalr77man/DB-Library-Management-System

- Designed a relational database with ERD and relational mapping covering books, authors, members, branches, loans, reservations, fines, and book damage repair tracking.
- Implemented constraints, views, stored procedures, triggers, and indexes, with query optimization in T-SQL.

Smart Parking System | *Arduino, C/C++, Tinkercad (University Project)*

Simulation: tinkercad.com/things/4TnrtVVLAil

- Designed and simulated an automated smart parking system in Tinkercad for the Microcontrollers course, using an Arduino, servo motors, and ultrasonic sensors for real-time vehicle detection.
- Developed the control logic and integrated a 7-segment display for dynamic slot availability tracking.

TRAINING & EXPERIENCE

Full Stack Web Development (.NET Track) | Digital Egypt Pioneers Initiative (DEPI) *(2026)*

- Enrolled in comprehensive technical training supported by MCIT focused on enterprise .NET web development.
- Building practical skills in building RESTful Web APIs, database design, software design patterns, and agile practices.

Self-Directed .NET Web Development Study | Self-Learning & Online Resources *(2025 – Present)*

- Completed ~1 year of self-directed technical study using online tutorials, YouTube courses, and official documentation.
- Mastered core concepts of C#, ASP.NET Core Web API, LINQ, and SQL Server through hands-on practice and application development.

Backend .NET Trainee | Information Technology Institute (ITI) *(Summer 2025)*

- Completed a 145-hour .NET web development program covering C#, SQL Server, Entity Framework, and ASP.NET MVC, ending with a hands-on capstone project.
- Practiced database operations and Entity Framework Core with SQL Server.

COMPETITIVE PROGRAMMING & PROBLEM SOLVING

Active Problem Solver | Codeforces & ICPC Community

- Solved over 200 algorithm and data structure problems on Codeforces, focusing on time and space complexity optimization.
- Participated in technical problem-solving tracks within the ICPC Zagazig University Community.

COURSES & CERTIFICATIONS

- Digital Egypt Pioneers Initiative (DEPI) – Full Stack Web Development Track (2026)
- ASP.NET Core Web API – Steps Learning (2026)
- Algorithm Analysis and Design from A to Z – Udemy (2025)
- Web Development Using .NET (145 hours) – Information Technology Institute (ITI), Jul–Aug 2025
- Problem Solving Training – ICPC Zagazig Community (2025)
- Data Structures Fundamentals – Learn Simply (2024)

LANGUAGES

• **Arabic:** Native | • **English: Intermediate**
